# What Makes Our BioBadge Card Holders Environmentally Friendly?

At Total ID we are always striving to offer new and improved products.

Due the environmental factors we decided to change all our open faced single and dual sided card holders to an oxo-biodegradable plastic.

Made from Oxo-biodegradable plastic, our clear BioBadge degradable card holders are our best selling card holder.

They play a significant role in helping organisations reduce their carbon footprint. The moulded ridge design reduces card bending or cracking resulting in fewer cards being reissued, therefore saving you both time and money.
